Qualifications

Qualification: MSc Epidemiology and Biostatistics

County of study: Kenya

Start date: 01/08/2024

Ongoing: Yes

Institution: Jaramogi Oginga Odinga University of Science and Technology

Mode of study: Part Time

Date of award: 18/12/2026

Final / expected result: Thesis

Qualification: Bachelor of Science (Honours) in Statistics

Mode of study: Full Time

Institution: University of Nairobi

County of study: Kenya

Start date: 03/09/2012

Date of award: 02/12/2016
Final / expected result: Second Class
Upper Division

Ongoing: No

Employment

Job title: Statistician & Research Data Analyst

Job details: Lead statistical design, data management, and advanced analysis for multi-country health systems and implementation research projects across East Africa. Designed and implemented statistical analysis plans (SAPs) for applied health research studies. Conducted regression modelling, survival analysis, and longitudinal data analysis using R and Stata. Managed large, multi-site datasets ensuring data integrity, reproducibility, and adherence to research protocols. Supervised data harmonisation across Kenya, Uganda, Tanzania, and Rwanda research sites. Contributed to manuscript preparation and co-authored peer-reviewed publications.

Employer: Georgetown University East Africa
Contract type: Temporary
End date:

Country of the post: Kenya
Employment status: Full Time
Start date: 01/04/2025

Job title: Statistician – Surveillance & Applied Epidemiology

Job details: Provided advanced statistical support for infectious disease surveillance and rural health systems research. Developed and implemented statistical models for disease trend analysis and forecasting. Led data management workflows for longitudinal cohort and surveillance datasets. Performed multivariable regression, time-to-event analysis, and risk factor modelling. Contributed to grant reporting and peer-reviewed manuscripts.

Supported protocol development and sample size calculations for observational studies. Collaborated with clinicians, epidemiologists, and field teams to ensure methodological rigour
Start date:03/04/2023

Employer: Kenya Medical Research Institute (KEMRI)
Country of the post: Kenya
Employment status: Full Time
Contract type: Temporary
End date: 28/03/2025

Job title: Research Data Manager

Job details: Led statistical oversight and data systems design for multi-country applied research projects in health and sustainable development. Developed statistical analysis frameworks for mixed-methods studies. Managed cross-country research databases and quality control systems. Conducted inferential statistical analyses and impact evaluations. Produced technical reports and contributed to academic manuscripts. Trained research teams in statistical methods and data quality assurance.

Employer: JOOUST & VLIR-UOS Regional Programme
Contract type: Temporary
End date: 28/04/2023

Country of the post: Kenya
Employment status: Full Time
Start date:01/11/2021

Job title: Research Data Analyst

Job details: Supported applied research projects through statistical analysis, data management, and technical reporting. Designed survey instruments and data management protocols. Conducted regression analysis and descriptive epidemiology. Cleaned and structured large datasets using R and Stata. Produced analytical briefs for research partners and stakeholders.

Employer: LERIS Hub
Employment status: Full Time
Start date:04/09/2017

Country of the post: Kenya
Contract type: Temporary
End date: 03/05/2021

Job title: Data Specialist

Job details: Supported implementation research through statistical data management and analysis. Established

digital data collection systems.
Conducted statistical summaries and trend analysis. Supported reporting and interpretation of findings.
Contract type: Temporary
End date: 25/08/2017

Employer: Lake Region Community Development Initiative
Country of the post: Kenya
Employment status: Part Time
Start date:02/05/2016

Personal Statement

I did not arrive in medical statistics through a straight path. My journey has been shaped by responsibility, loss, resilience, and a deep desire to use data to improve lives.

I lost both my parents when I was twelve years old. From that moment, education was no longer just about ambition. It became survival. I balanced school with caring for my siblings
